

INDEX TO VOL. LXXXIII. (A)

- Aberrations of symmetrical optical instrument (Pocklington), 99.
Abney (Sir W. de W.) On the Change in Hue of Spectrum Colours by Dilution with White Light, 120 ; — On the Extinction of Colour by Reduction of Luminosity, 290 ; — Colour Blindness and the Trichromatic Theory of Colour-vision, 462.
Actinium, ionisation of gases by β -rays of (Kleeman), 530.
Æther-stress, motional effect of the Maxwell (Cunningham), 109.
Air, thermal conductivity of (Todd), 19.
Alkali metals, absorption spectra of vapours of (Bevan), 421.
 α - and β -rays, phosphorescence produced by (Marsden), 548.
 α -Particles from radio-active substances, photographic action of (Kinoshita), 432.
 α -Particles, scattering of, by matter (Geiger), 492.
 α -Rays, theory of luminosity produced by (Rutherford), 561.
Antropoff (A. von) The Solubility of Xenon, Krypton, Argon, Neon, and Helium in Water, 474.
Arc spectra, effect of pressure upon.—Titanium (Rossi), 414.
Argon group, solubility of gases of (Antropoff), 474 ; — viscosities of gases of (Rankine), 516.
Atmosphere, solubility of rare gases of, in water (Antropoff), 474.

Bakerian Lecture (Larmor), 82 ; — (Poynting and Barlow), 534.
Barlow (G.) See Poynting and Barlow.
Becquerel (A. H.) Obituary notice of, xx.
Bedford (T. G.) The Depression of Freezing Point in very Dilute Aqueous Solutions, 454.
Berry (A. J.) See Soddy and Berry.
Bevan (P. V.) The Absorption Spectra of Vapours of the Alkali Metals, 421.
Boiling points of metals, influence of pressure on (Greenwood), 483.

Callendar (H. L.) and Moss (H.) The Boiling Point of Sulphur corrected by Reference to New Observations on the Absolute Expansion of Mercury, 106.
Carbon disulphide, change into gaseous product (Dewar and Jones), 526.
Carbon monosulphide, note on (Dewar and Jones), 408.
Chapman (J. C.) and Porter (H. L.) On the Physical Properties of Gold Leaf at High Temperatures, 65.
Chree (C.) Some Phenomena of Magnetic Disturbances at Kew, 579.
Colour blindness and trichromatic theory (Abney), 462.
Colour extinction by reduction of luminosity (Abney), 290.
Colour vision, trichromatic theory of, and colour blindness (Abney), 462.
Colours, spectrum, change in hue by dilution with white light (Abney), 120.
Cunningham (E.) The Motional Effects of the Maxwell Æther-stress, 109 ; — On the Velocity of Steady Fall of Spherical Particles through Fluid Medium, 357.
Cuthbertson (C. and M.) On the Refraction and Dispersion of Neon, 149 ; — On the Refraction and Dispersion of Air, Oxygen, Nitrogen, and Hydrogen, and their Relations, 151 ; — On the Refraction and Dispersion of Sulphur Dioxide and Hydrogen Sulphide, and their Relation to those of their Constituents, 171.

- Dewar (Sir J.) Long-period Determination of the Rate of Production of Helium from Radium, 404.
- Dewar (Sir J.) and Jones (H. O.) Note on Carbon Monosulphide, 408; — The Change of Carbon Disulphide into a Gaseous Product condensable and explosive near the Temperature of Liquid Air, 526.
- Differential equations, arithmetical solution by finite differences of physical problems involving (Richardson), 335.
- Diffraction figures due to heliometer, nature of (Everitt), 302.
- Electrified systems of finite extent, initial accelerated motion of (Walker), 336.
- Elgar (F.) Obituary notice of, viii.
- Ellerman (F.) See Hale and Ellerman.
- Everitt (P. F.) On the Nature of the Diffraction Figures due to the Heliometer, 302.
- Filon (L. N. G.) Measurements of the Absolute Indices of Refraction in Strained Glass, 572.
- FitzGerald (M. F.) On Flapping Flight, 72.
- Flight, on flapping (FitzGerald), 72.
- Flow of water through pipes and passages with converging or diverging boundaries (Gibson), 366.
- Fluid medium, velocity of steady fall of spherical particles through (Cunningham), 357.
- Fluid under gravity, propagation of disturbance in (Pidduck), 347.
- Fowler (A.) The Spectrum of Magnesium Hydride, 210.
- Francis (A. G.) See Thorpe and Francis.
- Freezing point, depression of, in very dilute aqueous solutions (Bedford), 454.
- Functions of positive and negative type (Mercer), 69.
- γ -Rays, experiments in polarisation of (Kleeman), 40.
- Gases, conduction of heat through rarefied (Soddy and Berry), 254; — method of determining viscosity of (Rankine), 265; — of argon group, viscosities of (Rankine), 516.
- Geiger (H.) The Scattering of the α -Particles by Matter, 492; — The Ionisation produced by an α -Particle. Part II.—Connection between Ionisation and Absorption, 505.
- Geikie (Sir A.) Address at Anniversary Meeting, November 30, 1909, 229.
- Gibson (A. H.) On the Flow of Water through Pipes and Passages having Converging or Diverging Boundaries, 366.
- Gold leaf at high temperatures, physical properties of (Chapman and Porter), 65.
- Greenwood (H. C.) The Influence of Pressure on the Boiling Points of Metals, 483.
- Hale (G. E.) and Ellerman (F.) On the Nature of the Hydrogen Flocculi and their Structure at Different Levels in the Solar Atmosphere, 177.
- Heat conduction in rarefied gases (Soddy), 254.
- Heliometer diffraction figures, nature of (Everitt), 302.
- Helium, accumulation of, in geological time (Strutt), 96, 298; — rate of production of, from radium (Dewar), 404.
- Hicks (W. M.) A Critical Study of Spectral Series. Part I.—The Alkalies, H and He 226.
- Hill (E. G.) and Sirkar (A. P.) The Electric Conductivity and Density of Solutions of Hydrogen Fluoride, 130.

- Humfrey (J. C. W.) See Rosenhain and Humfrey.
- Hydrogen flocculi in solar atmosphere (Hale and Ellerman), 177.
- Hydrogen fluoride, electric conductivity and density of solutions of (Hill), 130.
- Ionisation of a molecule by an α -particle (Kleeman), 195 ; — produced by an α -particle.
 Part II (Geiger), 505 ; — by β -rays of actinium (Kleeman), 530.
- Ions, recombination at different temperatures (Phillips), 246.
- Iron at high temperatures, crystalline structure of (Rosenhain and Humfrey), 200.
- Isogeotherms under mountain ranges in radio-active districts (Lees), 339.
- Jennings (H. W. K.) See Wilson (E.) and others.
- Jones (H. O.) See Dewar and Jones.
- Kaye (G. W. C.) On the Distribution of the Röntgen Rays from a Focus Bulb, 189.
- Kinoshita (S.) The Photographic Action of the α -Particles emitted from Radio-active Substances, 432.
- Kleeman (R. D.) Experiments to test whether the Secondary γ -Rays are polarised, 40 ;
 — On the Nature of the Ionisation of a Molecule by an α -Particle, 195 ; — The Ionisation of Various Gases by the β -Rays of Actinium, 530.
- Larmor (Sir J.) On the Statistical and Thermodynamical Relations of Radiant Energy (Bakerian Lecture), 82.
- Lees (C. H.) On the Shapes of the Isogeotherms under Mountain Ranges in Radio-active Districts, 339.
- Light, pressure of, against source (Poynting and Barlow), 534.
- Magnesium hydride, spectrum of (Fowler), 210.
- Magnetic disturbances at Kew, some phenomena of (Chree), 579.
- Magnetisation, effect of previous history on (Wilson and others), 1.
- Magnetism, terrestrial, phenomenon in diurnal inequality of (Sangster), 428.
- Magneto-cathodic rays, nature of (Thirkill), 324.
- Marsden (E.) The Phosphorescence produced by the α - and β -Rays, 548.
- Mascart (E. E. N.) Obituary notice of, i.
- Mees (C. E. K.) On the Resolving Power of Photographic Plates, 10.
- Mercer (J.) Functions of Positive and Negative Type, and their Connection with the Theory of Integral Equations, 69.
- Metals, influence of pressure on boiling points of (Greenwood), 483.
- Moss (H.) See Callendar and Moss.
- Neumayer (G. v.) Obituary notice of, xi.
- Obituary notices of Fellows deceased :—
- Becquerel (A. H.), xx.
- Elgar (F.), viii.
- Mascart (E. E. N.), i.
- Neumayer (G. v.), xi.
- Rosse (Lord), xv.
- Wilson (W. E.), iii.
- O'Dell (G. F.) See Wilson (E.) and others.

- Phillips (P.) Recombination of Ions at Different Temperatures, 246.
 Phosphorescence produced by α - and β -rays (Marsden), 548 ; — theory of (Rutherford), 561.
 Photographic plates, resolving power of (Mees), 10.
 Pidduck (F. B.) On the Propagation of a Disturbance in a Fluid under Gravity, 347.
 Pocklington (H. C.) The Aberrations of a Symmetrical Optical Instrument, 99.
 Polarisation of X-rays (Vegard), 379.
 Porter (H. L.) See Chapman and Porter.
 Poynting (J. H.) and Barlow (G.) The Pressure of Light against the Source : the Recoil from Light (Bakerian Lecture), 534.
 President's Address, November 30, 1909 (Geikie), 229.
- Radiant energy, statistical and thermodynamical relations of (Larmor), 82.
 Radio-active substances, photographic action of α -particles emitted from (Kinoshita), 432.
 Radium emanation, spectrum of (Watson), 50.
 Radium, rate of production of helium from (Dewar), 404.
 Rain and snow, electricity of (Simpson), 394.
 Rankine (A. O.) On a Method of Determining the Viscosity of Gases, especially those Available only in Small Quantities, 265 ; — On the Viscosities of the Gases of the Argon Group, 516.
 Rayleigh (Lord) On the Perception of the Direction of Sound, 61.
 Refraction and dispersion of neon (Cuthbertson), 149 ; — air, oxygen, nitrogen, and hydrogen (Cuthbertson), 151 ; — sulphur dioxide and hydrogen sulphide (Cuthbertson), 171.
 Refraction in strained glass, measurements of absolute indices of (Filon), 572.
 Richardson (L. F.) On the Approximate Arithmetical Solution by Finite Differences of Physical Problems involving Differential Equations, 335.
 Röntgen rays from focus bulb, distribution of (Kaye), 189.
 Rosenhain (W.) and Humfrey (J. C. W.) The Crystalline Structure of Iron at High Temperatures, 200.
 Rosse (Lord) Obituary notice of, xv.
 Rossi (R.) The Effect of Pressure upon Arc Spectra.—Titanium, 414.
 Rutherford (E.) Theory of the Luminosity produced in certain Substances by α -Rays, 561.
- Sangster (R. B.) On a Novel Phenomenon in the Diurnal Inequality of Terrestrial Magnetism at certain Stations, 428.
 Sewell (C. J. T.) The Extinction of Sound in a Viscous Atmosphere by Small Obstacles of Cylindrical and Spherical Form, 547.
 Simpson (G. C.) On the Electricity of Rain and Snow, 394.
 Sirkar (A. P.) See Hill and Sirkar.
 Soddy (F.) and Berry (A. J.) Conduction of Heat through Rarefied Gases, 254.
 Solar atmosphere, nature and structure of hydrogen flocculi in (Hale and Ellerman), 177.
 Sound, extinction of, in viscous atmosphere by small obstacles (Sewell), 547 ; — perception of direction of (Rayleigh), 61.
 Spectra, absorption, of alkali metals (Bevan), 421.
 Spectral series, critical study of, Part I (Hicks), 226.
 Standards of length, wave-length comparator and rulings for (Tutton), 79.
 Strontium, atomic weight of (Thorpe and Francis), 277.
 Strutt (R. J.) Note on the Spontaneous Luminosity of a Uranium Mineral, 70 ; — The Accumulation of Helium in Geological Time—II, 96 ; III, 298.
 Sulphur, boiling point of, corrected (Callendar and Moss), 106.

- Thallium, relation of, to the alkali metals (Tutton), 211.
- Thermal conductivity of air (Todd), 19.
- Thirkill (H.) On the Nature of Magneto-cathodic Rays, 324.
- Thorpe (Sir E.) and Francis (A. G.) On the Atomic Weight of Strontium, 277.
- Tidal constants, harmonic, for Chinese and New Zealand ports (Wright), 127.
- Titanium, effect of pressure on arc spectrum of (Rossi), 414.
- Todd (G. W.) Thermal Conductivity of Air and other Gases, 19.
- Tutton (A. E. H.) A Wave-length Comparator for Standards of Length, 79 ; — The Use of Wave-length Rulings as Defining Lines on Standards of Length, 81 ; — The Relation of Thallium to the Alkali Metals : a Study of Thallium-Zinc Sulphate and Selenate, 211.
- Uranium mineral, spontaneous luminosity of (Strutt), 70.
- Vegard (L.) On the Polarisation of X-Rays compared with their Power of Exciting High-velocity Cathode Rays, 379.
- Walker (G. W.) The Initial Accelerated Motion of Electrified Systems of Finite Extent and the Reaction produced by the Resulting Radiation, 336.
- Watson (H. E.) The Spectrum of Radium Emanation, 50.
- Wave-length comparator and rulings for standards of length (Tutton), 79, 81.
- Wilson (E.) and others. On the Effect of Previous Magnetic History on Magnetisation, 1.
- Wilson (W. E.) Obituary notice of, iii.
- Wright (T.) Harmonic Tidal Constants for certain Chinese and New Zealand Ports, 127.
- X-rays, polarisation of, compared with their power of exciting high-velocity cathode rays (Vegard), 379.

END OF THE EIGHTY-THIRD VOLUME (SERIES A).
